

PROFESSIONAL SUMMARY

Senior QA with 15+ years of experience across the full SDLC in IoT, healthcare (GxP), pharma, banking, tolling, and fintech environments. Specialized in backend testing, SQL-based data validation, ETL verification, API/REST testing, and Python scripting for large-scale data quality assurance. Postgraduate in Data Governance (UBA), combining a strong technical QA background with expertise in data quality and compliance. Proven track record reducing critical defects through rigorous test strategy, risk-based testing, and cross-functional collaboration in regulated environments. Experienced collaborating with globally distributed teams across North America, Europe, and Latin America

KEY EXPERTISE

Backend Testing | SQL Data Validation | ETL & Data Pipeline Testing | REST API Testing | Python Validation Scripting | IoT Testing (MQTT) | Data Quality Assurance | Risk-Based Testing | GxP Software Validation

TECHNICAL SKILLS

- Data Validation: SQL (Advanced), PostgreSQL, ETL Testing, Data Pipeline Validation
- API Testing: REST, SOAP, Postman, Swagger, SoapUI
- Programming: Python (data validation, scripting)
- IoT: MQTT, Bluetooth, Device-to-Cloud Communication
- Reporting & Analytics: Power BI, KPI Dashboards
- DevOps & ALM: Jira, Azure DevOps, Jenkins, GitLab, Docker, Confluence, HPQC
- Methodologies: Agile, Scrum, SAFe, SDLC/STLC, Risk-Based Testing
- Regulated Environments: GxP, FDA, Banking

PROFESSIONAL EXPERIENCE

IoT QA Engineer | *Fortune Brands Innovations* | *Argentina*

Oct 2023 – Present

- Lead QA strategy for IoT-enabled smart systems, validating Bluetooth connectivity, backend services, message reliability, and end-to-end system performance.
- Design and execute regression, integration, and end-to-end test strategies, contributing to a 15% reduction in post-release defects
- Collaborate closely with distributed product and development teams in grooming sessions, influencing feature design and testability from the earliest stages

IoT UAT Software Analyst | *Cloud Studio IoT* | *Argentina*

Feb 2023 – Sep 2023

- Performed UAT and backend validation for IoT platforms, verifying MQTT QoS, API workflows, data integrity, and end-to-end system integrations
- Executed comprehensive web and mobile functional, regression, and end-to-end testing, ensuring product quality across IoT platforms
- Built dashboards and quality metrics to monitor defect trends, test execution, and sprint progress, providing actionable insights to stakeholders

Sr. QA Engineer - Prod Team | *Boehringer Ingelheim* | *Argentina*

Jul 2019 – Feb 2023

- Defined QA strategies and executed software validation activities in regulated GxP pharmaceutical environments, managing the defect lifecycle end-to-end
- Performed root-cause analysis using logs, database queries, and cross-functional collaboration, supporting software validation in compliance with GxP and FDA regulatory requirements.
- Performed backend testing using SQL, REST APIs, database queries, and log analysis to validate data integrity and system behavior.
- Mentored QA engineers and drove continuous process improvement

Quality Assurance Lead / *Grupo OSDE* / *Argentina***Jan 2017 – Jun 2019**

- QA for mission-critical healthcare systems; defined risk-based testing strategies aligned to regulatory requirements
- Led QA adoption during the migration from HP Quality Center to Jira, improving test management and collaboration. Coordinated testing across business, development, and architecture teams; supported release activities

Sr. R&D Test Engineer / *Kapsch TrafficCom* / *Argentina***May 2010 – Dec 2016**

- Led SIT, UAT, and SAT validation for large-scale Intelligent Transportation Systems deployed internationally, enabling successful customer acceptance and production rollout
- Developed Python validation scripts and performed backend testing using SQL, REST APIs, database queries, and log analysis to automate data validation and improve test accuracy
- Daily collaboration with international stakeholders, translating technical testing outcomes into clear business insights while coordinating customer acceptance activities across multiple countries

QA Team Leader / *IntelligenX* / *Argentina***Dec 2009 – Apr 2010**

- Managed a QA team across multiple projects; oversaw planning, resource allocation, and quality reporting.
- Defined testing standards and best practices adopted across the organization

Sr. Software Quality Assurance / *Accenture* / *Argentina***Jun 2008 – Dec 2009**

- Functional, integration, regression, and database testing for banking and financial applications.
- Validated data using complex SQL queries; managed defect tracking in HP Quality Center
- Performed backend validation using SQL queries and supported integration testing across enterprise banking systems

QA Internship / *HP (Hewlett-Packard)* / *Argentina***May 2006 – Aug 2007**

- First QA role: learned functional testing, defect reporting, and quality processes in an enterprise environment

EDUCATION & CERTIFICATIONS

- Postgraduate Degree in Data Governance & Compliance | *University of Buenos Aires* | 2024
- Diploma in Legal Blockchain & Crypto Assets | *UCEMA* | 2023
- Law Degree (JD Equivalent) | *University of Belgrano* | 2016
- Grand ScrumMaster® (GSDC) | *UTN* | 2019

Open to remote work and relocation
